

# PERSONAL PROTECTIVE EQUIPMENT

*function — of beauty*

## **PPE must fit and be worn properly**

PPE that is too large or small may not properly protect you and can create more hazards. Always wear the correct PPE!

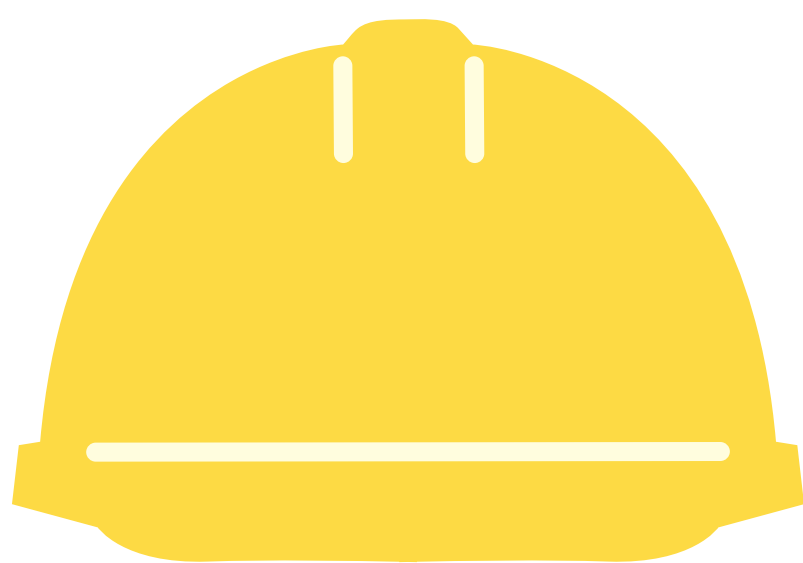

## **Reusable PPE must be kept clean**

PPE that is reusable should be cleaned after each use and inspected before each use.

## **PPE doesn't last forever**

Worn out PPE may not provide protection. Replace PPE when it shows signs of wear or when the manufacturer requires it.

## **PPE only protects you when you wear it**

Even the most expensive, highest quality PPE won't protect you if it isn't worn

## **Stay cautious while wearing PPE**

NO piece of PPE will protect you against every hazard. No matter what PPE you wear, it is still essential to follow all safety procedures at Function of Beauty!

# SAFETY STARTS WITH YOU!
